

## Задание 1

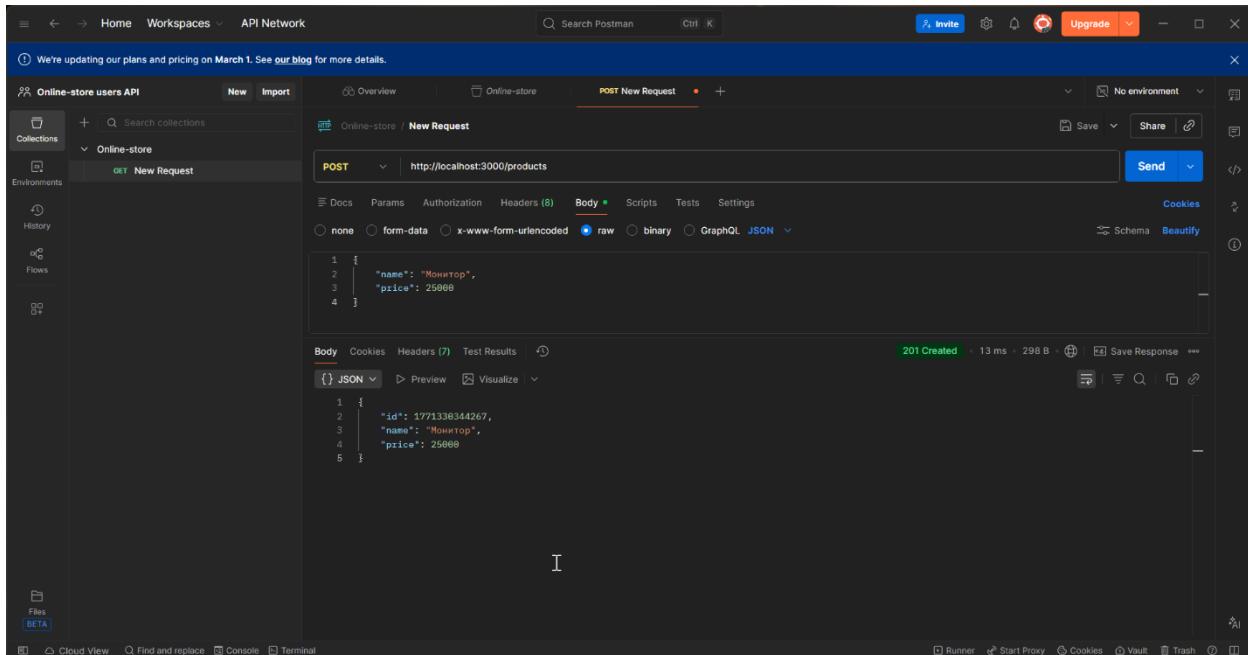

### 1. Get запрос – получение товара по id.

The screenshot shows the Postman interface with a 'GET New Request' configuration. The URL is set to `http://localhost:3000/products/2`. The response body is displayed as JSON:

```
1 {  
2   "id": 2,  
3   "name": "Монитор",  
4   "price": 1500  
5 }
```

### 2. Post запрос – добавление нового товара

The screenshot shows the Postman interface with a 'POST New Request' configuration. The URL is set to `http://localhost:3000/products`. The request body is a JSON object:

```
1 {  
2   "name": "Монитор",  
3   "price": 25000  
4 }
```

The response status is `201 Created`, and the response body is:

```
1 {  
2   "id": 1771338344267,  
3   "name": "Монитор",  
4   "price": 25000  
5 }
```

### 3. Patch запрос – обновление товара

The screenshot shows the Postman interface with a dark theme. On the left, there's a sidebar with 'Online-store users API' selected, showing collections like 'Online-store' and 'New Request'. The main area has a 'PATCH New Request' tab open. The URL is set to `http://localhost:3000/products/3`. The 'Body' tab is selected, showing raw JSON data:

```
1 {  
2   "name": "Мировая клавиатура",  
3   "price": 4500  
4 }
```

Below the body, the response status is `200 OK` with a duration of `8 ms` and a size of `301 B`. The response body is also shown in JSON format:

```
1 {  
2   "id": 3,  
3   "name": "Мировая клавиатура",  
4   "price": 4500  
5 }
```

## Задание 2

### 1. Get запрос – получение случайного фото котика

The screenshot shows the Postman interface with a dark theme. On the left, there's a sidebar with 'Online-store users API' selected, showing collections like 'Online-store' and 'New Request'. The main area has a 'GET New Request' tab open. The URL is set to `https://api.thecatapi.com/v1/images/search`. The 'Body' tab is selected, showing raw JSON data:

```
1 Ctrl+Alt+P to Ask AI
```

Below the body, the response status is `200 OK` with a duration of `543 ms` and a size of `1.14 KB`. The response body is also shown in JSON format:

```
1 [  
2   {  
3     "id": "CG0170471",  
4     "url": "https://cdn2.thecatapi.com/images/CG0170471.jpg",  
5     "width": 1000,  
6     "height": 648  
7   }  
8 ]
```

### 2. Get запрос – получение 10 случайных котиков

The screenshot shows the Postman application interface. On the left, there's a sidebar with 'Online-store users API' selected, showing collections like 'Online-store' and 'GET New Request'. The main area shows a 'New Request' tab for 'Online-store / New Request' with a GET method to 'https://api.thecatapi.com/v1/images/search?limit=10'. The response status is 200 OK, and the response body is a JSON array of cat images:

```
[{"id": "MTgyMjQyNQ", "url": "https://cdn2.thecatapi.com/images/MTgyMjQyNQ.jpg", "width": 700, "height": 700}, {"id": "0vXzg857G", "url": "https://cdn2.thecatapi.com/images/0vXzg857G.jpg", "width": 1000, "height": 945}, {"id": "xIICfnlNm", "url": "https://cdn2.thecatapi.com/images/xIICfnlNm.jpg", "width": 1696, "height": 2544}]
```

### 3. Get запрос – случайный котик по породе (Абиссинская)

The screenshot shows the Postman application interface. On the left, there's a sidebar with 'Online-store users API' selected, showing environments and 'GET New Request'.
